

Ethereum Price Trends

Assignment 5

COMP541 Fall 2022

Group 2:

Ara Barkhordari

Nicholas Barrios

Seth Ortiz

Kyle Thomas

Tomothy Tran

Maham Marashizadeh

Relevant Attributes

Our dataset contains the following attributes:

```
timestamp
Asset_ID
Asset_Name
Weight
Count
Open
High
Low
Close
Volume
VWAP
Target
```

Our project will use only the **Open** and **Close** attributes. Since we are looking at pricing trends over time, those two columns are the most relevant to our goal and will allow us to build an efficient model from the large amount of data in our dataset.
